The MAILING DATE of this co	ommunication ap <sub>l</sub>	pears on the cover sheet with t	the correspondence address					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

U.S. Patent and Trademark Office PTOL-326 (Rev. 1-04) Application/Control Number: 10/813,136 Page 2

Art Unit: 1752

#### **DETAILED ACTION**

This is written in reference to application number 10/813,1368 filed on March 31, 2004 and published as US 2004/0191679 A1 on September 30, 2004.

#### Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### Information Disclosure Statement

2. The Information Disclosure Statement(s) filed on June 30, 2004 and December 29, 2004 has/(have) been entered and fully considered.

### **Double Patenting**

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-7 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/838,316 [Shibuya]. Although the conflicting claims are not identical, they are not patentably distinct from each other because both pertain to a compound represented by formula (1)

Application/Control Number: 10/813,136

Art Unit: 1752

$$R_2$$
 $R_3$ 
 $R_4$ 
 $R_5$ 

wherein A is an aromatic or heterocyclic ring which may have a

substituent, X is O, S or NR7. The claims further pertain to a photosensitive composition comprising (i) a sensitizing dye of said formula (1), (ii) an activator compound, and (iii) a compound changing its physical or chemical property. One of ordinary skill in the art would have been motivated by the claims of Shibuya to make a composition comprising a compound of formula (1).

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Murota et al. (EP 1048982 A1). Murota teaches a photopolymerizable composition comprising (I) a sensitizing dye

represented by formula (III-1)

, (II) a titanocene compound and (III) a compound

which reacts with at least either a radical or acid to change and retain at a physical or chemical characteristics. In formula (III-1), A is an aromatic or heterocyclic ring, which may have a substituent; X is O, S or N(R3); R1, R2, R3 each represents a hydrogen atom or a monovalent non-metallic atomic

Art Unit: 1752

group (p. 0018). Murota teaches that R1, R2 and R3 preferred examples of the aryl groups include phenyl and naphthy (p. 0140-0141). It is the examiner's position that when X is NR3 and R3 is the preferred phenyl or naphthyl group, the limitations of claimed formula (3) are met. Specific examples of the said

D27 meets the limitations of claimed formula (2).

- 7. Example I-3 exemplifies a composition comprising pentaerythritol tetraacrylate (claimed component C); allymethacrylate/methacrylic acid copolymer (claimed component D); sensitizing dye (D2) (claimed component A); a titanocene compound (T2) (claimed component B); and a co-sensitizer (H-2) (claimed component E-1) (p. 0235, Table I-1). See also example I-5, I-7, I-8, II-1, II-7, II-10, II-11, II-15, III-2, III-8 and III-10 and claims 5-7.
- 8. The examiner notes that US 6335144 B1 is the US equivalent of the cited reference to Murota.

  The said reference is also applicable under 35 USC 102(b). However for the sake of brevity, duplicates rejections will not be made herewith.
- 9. Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mousseron (US 3678041 A). Mousseron teaches a 5-substituted thiazolidine-4-one having the formula

(abstract). The said compound meets the limitations of the

Application/Control Number: 10/813,136 Page 5

Art Unit: 1752

instant claim when n=0, X=0, S or NR2 wherein R2 is a hydrogen, an alkyl, alkenyl, cycloalkyl, aryl aralkyl or arylsulphonyl group. Table III exemplifies a compound having the following formula

Example 29, code 10986 exemplifies the said compound

wherein n=0, R1 is phenyl and R2 is phenyl.

- 10. Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sawdey (US 2739888
- Sawdey teaches compound of general formula (I)
- (c. 1, 1. 66-70). Specific

examples include: 
$$C_{eH_1-N=0}$$
  $C_{eH_2-N=0}$   $C_{eH_1-N=0}$   $C$ 

- 11. Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wells (US 4195179
- A). Wells teaches 5-(indol-3-ylmethylene)-1,3-dimethyl-2-methylimino-4-imidazolidinone compounds

having the formula 
$$\stackrel{\text{H}}{\underset{\text{H}}{\text{V}}} \stackrel{\text{CH}_{\text{J}}}{\underset{\text{N-CH}_{\text{J}}}{\text{CH}_{\text{J}}}} = (Z \text{ isomer}). See c. 1, 1. 15-30 and c. 2, 1. 10-15.$$

#### Conclusion

- Any inquiry concerning this communication or earlier communications from the examiner should 12. be directed to Yvette C. Thornton whose telephone number is 571-272-1336. The examiner can normally be reached on Monday-Thursday 8-6:30.
- 13. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia H. Kelly can be reached on 571-272-1526. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
